Dear Hal,

Just a quick note to tell you how much I appreciated your hospitality and also the thoughts you shared with Art (which he read to me) in your recent letter. I do not believe your adventures with your car in DC. That would be very frightening....

I still want your two file cabinets both because they are beautiful and because they would be a treasure to me because those are the ones you started with. I would only hope that my use of them is as distinguished. I have given some thought to replacing them for you (and shopping, etc.) and feel the best way would be for you to find what you want there, let me know how much, I'' send you a check for that amount, and you have the wooden ones shipped to me. Let me know what you think. I'll pay the shipping on the two wooden ones to me...but we must be careful to use a good firm that will handle them well and not beat them up.

Give my best to your bride...

Jodi
